Specific Gravity – It's That Easy!

New cost-effective SG-1000 maximizes specific gravity /density testing needs for any application

Milwaukee, Wisconsin –October 31, 2011 - The SG-1000 Digital Hydrometer is the newest addition to (Battery Testing Solutions Company), [Eagle Eye Power Solutions](#) (EEPS) best-selling SG-Series Digital Hydrometer/Density Meters product line. The SG-1000 is specifically designed to quickly & safely measure the temperature-compensated specific gravity of your batteries in a few clicks of a button. The unit is one of the most cost-effective and accurate solutions in the market today! The SG-1000 is available immediately and can be viewed on Eagle Eye Power Solution's website at <http://eepowersolutions.com/products/digital-hydrometers/sg-1000/> or ordered by calling (414) 962 – EEPS (3377).

Easy-to-Use!

Test results are completed with **one** click of a button. To measure, simply extract a sample in your suction tube and press the "START" button, it's that easy! The temperature compensated specific gravity is displayed on the screen. The user can select between the specific gravity reading and temperature reading by pressing "SELECT" button. The simplicity of this model makes it affordable for any testing requirement.

With a 99.998% accuracy rate and a 3-second measurement speed, the SG-1000 is guaranteed to save you time and money. The CE-certified unit is able to measure specific gravity and temperature simultaneously maximizing your battery testing needs. The SG-1000 is lightweight (8 oz), easy-to-use, durable, and comes in Fahrenheit or Celsius models to match your requirements. The measurement range of the unit is 1.000 – 1.3000 and has an operating temperature of 41° – 104°F, providing a wide-variety of testing applications. Each SG-1000 is housed in a robust carrying case weighing less than 5 lbs, making the SG-1000 one of the most accessible portable hydrometers in the market!

[Eagle Eye Power Solutions](#) works to ensure every employee and representative of our company is properly trained to understand our products and our core values. From the initial contact with the customer, through the education & sales process and continuing with post-sales support – we are there for our customers every step of the way! At EEPS we focus on building long-term, mutually beneficial relationships ("lifetime customers"). We always encourage customer feedback regarding ways that we can improve our products and support to better fit our customer's needs.

EEPS is your #1 source for Resistance Testers, Digital Hydrometers, Battery Monitoring and Load Banks.
