

AIRBRAVO EF

Extraction arm for pharmaceutical environments

For the dust control whenever
the Cross-Contamination is a concern
in the Pharmaceutical
and Biomedical industry.

Like working
in the open air!

AIRBRAVO EF is a single-pantograph extraction arm specially designed to eliminate the problem of cross contamination typical of the pharmaceutical and biomedical industries.

Features

The AIRBRAVO EF extraction arm is made entirely of AISI 316 stainless steel and may be fully dismantled to allow easy cleaning.

The pantograph support structure and flexible pipe are protected from dust by the patented sleeve cover in washable fabric, which helps to eliminate the problem of cross contamination.

The flexible pipe is of the type designed for alimentary use, with a smooth interior to limit the deposit of extracted dust.

Models

The AIRBRAVO EF extraction arm is available in the models with a nominal reach of 2 to 5 metres and a pipe diameter of 125 mm and 160 mm in the versions with or without horizontal extension.

Accessories

Protection grille, jib extensions, exhaust fan.

EF Arms Models		Code
